We'll introduce ourselves...

Ultimate Software BV was founded in 1993 and is located in Amersfoort in the Netherlands.

Ultimate Software is a Microsoft Gold Partner. Ultimate Software BV was the first organization to sell and implement Microsoft Dynamics AX (formerly known as Axapta) in the Netherlands.

The main focus of Ultimate Software is the implementation of standard ERP and business solutions, based on the Microsoft platform of products, such as Microsoft Dynamics AX, Office, SQL 2008 and SharePoint, using sophisticated technologies based on .NET.

ERP industry focus

Ultimate Software focuses on providing solutions to our customers that have a good return on investment and a high value. Ultimate Software focuses on delivering these solutions, based on the standard functionality of Dynamics AX, but we also deliver industry specific solutions that have been developed by our partners.

We focus on the following industries:

- Wholesale and distribution, logistics, warehouse management, retail
- Production (engineer to order, assembly to order, make to stock, make to order)
- Shipping (liner agencies, stevedoring, ports & harbour management system)
- Professional services automation
- CRM

The solutions we provide in these areas have been developed by our partners such as Manhattan Associates, Logica CMG, WM-Data, To-Increase etc. These solutions have a long tradition of expertise and quality. Together with Microsoft we can provide excellent support on these solutions.

Business Intelligence

Since corporate or enterprise performance management (CPM or EPM) is becoming more important, Ultimate Software has started a business unit in 2005 that focuses specifically on providing business intelligence solutions and services. Our solutions in this area are also based on the Microsoft platform (SQL 2008, Performance Point 2007, Business Scorecard manager etc. etc.). Ultimate Software is a Onestop reporting, Targit and TimeXtender certified partner.

Change management

Since implementing business software is a way to support the transformation of your business, we should not forget that change management is important. Our consultants are experienced in delivering these services in a standardized change management program.

'People ready'-solutions

It is important that our solutions are tailored to the organization that uses our solutions and to the people in the organization. With a structured approach and a thorough training and coaching of your people, we can support you in reaching your goals.

We focus on a fast implementation so that your return on investment is reached more quickly. Our methodology 'QuickWin' is specifically designed for this.

As a selected partner of Microsoft Dynamics, we can provide you with a strong, user friendly and innovative platform that is future proof and can help you in achieving your goals. The functionality of the standard Dynamics AX system is very broad and together with our partners, we can deliver you the specific functionality you need.
